

AMORNCHEAT THANAPREECHASIRI

Full Stack / Backend Developer (Film)

086-097-9060 kk1121335@gmail.com Don Mueang, Bangkok

CAREER OBJECTIVE

A motivated Computer Science and Software Innovation Development student with a strong foundation in full-stack development, database design, and automation technologies. Passionate about building modern web applications and backend systems. Seeking an entry-level Full Stack or Backend Developer role to leverage technical skills, contribute to impactful projects, and grow within a dynamic engineering team.

EDUCATION

In Progress **Bachelor of Science in Computer Science and Software Innovation Development**
Sripatum University
GPA: 3.09
Focus Areas: Software Engineering, Web Development, and Data Science.

TECHNICAL SKILLS

Proficient HTML/CSS, JavaScript, React, Node.js, Python, Figma, Postman

Familiar C#, SQL/NoSQL Database Design, MongoDB, MySQL, n8n Automation, Data Science & AI, Git/GitHub

Core Competencies RESTful API Design, JWT Authentication, Responsive Design, UX/UI Principles, Basic Machine Learning

FEATURED PROJECTS

M-Music | Music Streaming & Mood-Based Playlist Generator
Developed a music streaming platform featuring an automated mood-based playlist generation system.
Basic frontend classifying users using data from LocalStorage

Slide Me | Tow Truck & Roadside Assistance Application
Designed and built an application to facilitate quick and efficient roadside assistance and tow truck booking.
Integrated mapping API and backend services for real-time tracking.

Silky POS | Real-Time Ramen Shop Management Platform
Created a comprehensive Point of Sale (POS) system tailored for a Ramen shop to streamline daily operations and real-time order management.
Built with React, Node.js, and real-time database management.

Aqua Bot | AI (RAG) Platform for Freshwater Fish Farming
Developed an AI-driven platform utilizing Retrieval-Augmented Generation (RAG) technology to assist and provide accurate information for freshwater fish farming operations.
Integrated Python and AI models to process and retrieve domain-specific data.
